

## F&P Airvo™ 3

### Optiflow™ High Flow System

Delivering a mobile, uninterrupted  
and broader range of Optiflow  
High Flow Therapy

## F&P Airvo 3 Optiflow High Flow System.

A humidifier with integrated flow generator, delivering respiratory support and airway hydration with a focus on mobility and continuity across the patient journey.

### Backwards compatibility.

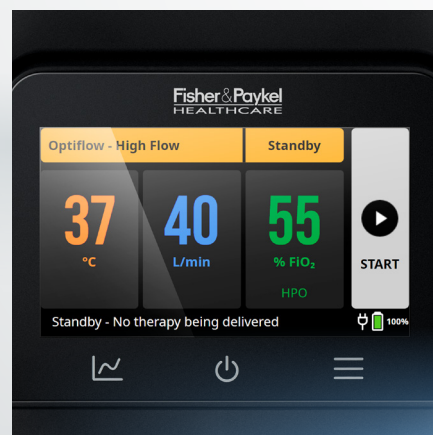

Compatible with existing Airvo 2 patient consumables, facilitating integration into an existing Airvo 2 fleet.

Extended compatibility to smaller Optiflow Junior 2 nasal interfaces.

### Designed for ease of use.

Simple touch screen display enables quick selection and adjustment of therapy settings.

Visualize patient trends and graphs.

### Broader flow range.\*

Flow range extended from 2 to 70 L/min to treat a wider group of patients.\*

One mode to enable Optiflow high flow applications across adult and pediatric applications.

### Flexible oxygen inputs.

Integrated blender with high-pressure oxygen input enables precise  $\text{FiO}_2$  adjustment directly on the device, automatically adjusting oxygen input to meet target  $\text{FiO}_2$ .

Alternative low-pressure oxygen input also available.

### Integrated battery.

Enables 40^ minutes of operating time to facilitate transport and patient mobilisation throughout the hospital environment, minimizing therapy interruption.

\* Compared to Airvo 2. ^ Typical operating time.

Hardware and accessories	Product Code
Airvo 3 device	PT301US
Mobile pole stand	900PT421
Mobile pole stand handle	900PT445
Mobile pole stand clamp	900PT428
Storage basket	900PT426
Oxygen-bottle holder	900PT427
HPO Dual-input manifold	900PT460D

^ Indicates a specific size of interface.

Patient consumables	Product Code
AirSpiral™ tube and chamber kit	900PT561
Optiflow+ nasal interface	OPT94X^
Optiflow+ Tracheostomy direct connect	OPT970
Optiflow+ Mask interface adapter	OPT980
Optiflow 3S nasal interface	OPT104X^
Optiflow Junior 2 nasal cannula (M, L, XL)	OJR414/416/418
Optiflow Junior 2+ nasal cannula (XXL)	OJR520
