The purpose of this program is to help consumers make choices about their education by recognizing entry-to-practice respiratory care programs that promote high-quality education and evidence-based medicine. The application may be submitted for the base (primary) entry-to-practice respiratory care program, the satellite entry-to-practice respiratory care program, or both. If the application includes the base program and the satellite program(s), all programs included in the application must meet the standards below.

The requirements for participating in the program are:

- Program must be in good standing with the Commission on Accreditation for Respiratory Care (CoARC).
  - Evidence to support this standard includes a copy of the official letter from CoARC attesting to the status of the program.

- A Doctor of Medicine or Osteopathy is designated as Medical Director of the program and is actively involved with student development.
  - Evidence to support this standard includes a copy of the Medical Director’s credentials and medical license.
  - A brief narrative detailing how this standard is met as well as documents to demonstrate active participation of the medical director in the curriculum (e.g., syllabi, lesson plans, advisory committee minutes, physician contact forms, etc.) is also required.

- Program must include at least one research methodologies course or course that includes significant content related to research methodologies.
  - Evidence to support this standard includes the course syllabus demonstrating significant course content related to research methodologies and a brief narrative detailing how this standard is met.
Program must include at least one education course that includes significant content related to educational principles (patient education, age-specific learning theories, etc.).
- Evidence to support this standard includes the course syllabus demonstrating significant course content related to educational principles and a brief narrative detailing how this standard is met.

Program must include at least one disease management course or course that includes significant content related to disease management.
- Evidence to support this standard includes the course syllabus demonstrating significant course content related to disease management and a brief narrative detailing how this standard is met.

Program must include at least one course or course that provides significant interprofessional educational opportunities through activities in a simulation laboratory, clinical rotations, or the classroom.
- Evidence to support this standard includes the course syllabus demonstrating significant course content related to interprofessional education and a brief narrative detailing how this standard is met.

Program must include at least one course on evidence-based practices or course that includes significant content related to evidence-based guidelines, including content on clinical practice guidelines.
- Evidence to support this standard includes the course syllabus demonstrating significant course content and clinical application related to evidence-based practice methodologies and a brief narrative detailing how this standard is met.

Program must include student completion of at least 10 service learning hours.
- Evidence to support this standard includes program policy or course syllabus defining the purpose of the activities and a brief narrative detailing the expectations of the service learning requirements.

Program must have an active Lambda Beta chapter.
- Evidence to support this standard includes proof of current, active chapter from the Lambda Beta organization.

Program must have received the CoARC Distinguished RRT award in the award cycle immediately prior to application submission.
- Evidence to support this standard includes a copy of the CoARC Distinguished RRT award certificate from the year in which the Apex application is submitted.
All respiratory therapy faculty (full-time, part-time, and adjunct) are licensed by the state (not applicable in Alaska) and hold a current registered respiratory therapist (RRT) credential.

Evidence to support this standard includes a completed employee roster that includes each respiratory therapist’s state license number and NBRC credential as well as copies of each respiratory therapist’s state license and NBRC credential validation (certificate, NBRC letter, or website verification).

All respiratory therapy faculty (full-time, part-time, and adjunct) have a baccalaureate degree, with at least 50% holding a master’s degree or higher or are currently pursuing a master’s degree.

Evidence to support this standard includes a copy of the earned baccalaureate and/or higher degree diploma or college transcript. If the employee is currently pursuing a master’s degree, a copy of the college transcript is sufficient.

The respiratory therapy program director must hold a current registered respiratory therapist (RRT) credential with a master’s degree or higher or be pursuing a master’s degree.

Evidence to support this standard includes a copy of the earned master’s or higher degree diploma or college transcript. If the employee is currently pursuing a master’s degree, a copy of the college transcript is sufficient.

All of the respiratory therapy faculty employees (full-time, part-time, and adjunct) are members of the AARC, and at least 50% belong to the AARC’s Education Section.

Evidence to support this standard includes the AARC number or copy of the AARC member profile showing active AARC and Education Section membership for each staff member. Adding the AARC number to the provided employee roster Excel spreadsheet is sufficient evidence.

The respiratory therapy program director and director of clinical education must be a member of the AARC and the AARC Education Section.

Evidence to support this standard includes the AARC number or copy of the AARC member profile showing active AARC and Education Section membership for the respiratory therapy program director and director of clinical education. Adding the AARC number to the provided employee roster Excel spreadsheet is sufficient evidence.

At least 75% of the respiratory therapy faculty (full-time, part-time, and adjunct) must hold at least one relevant specialty credential, to include: RRT-ACCS, RRT-NPS, CPFT, RPFT, RRT-SDS, AE-C, CTTS, RPSGT, or C-NPT.

Evidence to support this standard includes a completed employee roster that includes each respiratory therapist’s specialty credential as well as copies of each respiratory therapist’s credential validation (certificate, accrediting agency letter, or website verification).
